BIGGER AND BETTER

WE HAVE A PLAN

UP UP AND AWAY

***Fiftieth
Anniversary
Edition***

“It is with great pride that, as a family, this year we reach our 50th anniversary. The road has not been easy but, with love, passion and team work, every great challenge can be overcome. We thank you deeply for all the support you’ve shown us through the years. May we all be able to continue celebrating together for many years to come.”

GREAT INDOOR RIDES

Check out Zamperla's range of indoor rides!

Zamperla relationship with FEC dates back to the 1980's, starting with Mall of America (USA) and later followed by many other indoor parks. Today the Middle East FEC's market is one of the strongest world wide and one where Zamperla's presence is solid, with many rides spread across the area. To showcase all our rides locations we converged all information into one master plan to better illustrate Zamperla's presence in one of the strongest markets out there. Take a look!

WindstarZ

After a great first summer debut at the world famous Coney Island in Brooklyn New York, Zamperla's brand new WindstarZ made a big impact amongst the amusement world's elite during its 2015 IAAPA presentation in Orlando. The launch was a tremendous success: hundreds of enthusiastic amusement's professional were charmed by the ride and 4 immediately signed orders.

The WindstarZ kickoff was one of the most successful of any Zamperla rides debuts.

Many are the factors that have made the WindstarZ so successful:

- The ride's dangling movement gives the riders an authentic flying sensation.
- With the ability to steer the control bar, riders are in control of their own flights therefore truly becoming captains of their own experience.
- With its captivating forms and family oriented design, the ride is perfect for both families with children as well as teenagers.
- The architecture of the ride, its bold colors and aerodynamic lines make this ride an eye-catcher and undeniably the center of attention.
- With 12, two-people gondolas, the ride is able to simultaneously accommodate 24 riders per ride, making this ride a cost effective must for any park.

Originally sold to out-door spaces, the WindstarZ has now sparked enthusiasm from indoor parks. With current interest from a few FEC, 2017 will see this vibrant, multicolored, profitable, aerodynamic family ride as the center of attention in many indoor spaces!

Super Happy Swing

Following the great success of the over 65 Happy Swings installed across the globe, Zamperla has now created the Super Happy Swing.

With its larger design and its ability to host more passengers, this new and revisited ride can accommodate 16 passengers with a maximum of 4 adults. Now more riders can experience the thrill of air time, which will now reach an enjoyable 5,5m.

Balloon Fiesta

The trailer version of Zamperla's Balloon Fiesta Ferris Wheel has proved an instant success, quickly becoming the main children's area attraction for many carnivals. In the past two years, from its first IAAPA debut in 2014, 12 of these new rides were sold. Due to its considerable success, Zamperla has now developed a new park model version to fulfill requests from all who have shown interest in the ride. The first park model will grace a brand new

and upcoming FEC in Saudi Arabia. With 6 air balloons and a capacity of 24 riders (four children or two children and one adult per car) the 3-minute cruise will gift riders with precious family time while sharing a sky view of the park.
